Ci SERIES

KEF Ci Speaker Accessory Reference Guide

Rough-in Frames (new construction brackets) are used with in-wall and in-ceiling speakers and are available for most models. Installed during the pre-wiring of a new construction installation, they allow the installer to reserve the space in the wall or ceiling and simplify cutting the perfect hole size.

Metal Rear Enclosures (back boxes) are available for most models of KEF Ci Speakers. Installed during the pre-wiring of a new construction installation they provide a sealed enclosure for the loudspeaker and reduce sound transmission to the room behind the speaker.

Rear Enclosures

Rough-in Frames

* Due to integrated back can this unit is not compatible with the rear enclosure.

** Ci50R cut out is 70mm (2.76in.) with the rear can. The Ci50 rear can is able to be used in a retro-fit installation.

+ Use of metal rear enclosure with these models requires removal of integrated plastic rear can.

++ This unit is not compatible with the rear enclosure.

NOTE: Not all accessories available in every market. Check with local KEF Sales office for availability.
